

Nenad Lazic

JUNIOR SOFTWARE DEVELOPER (ANGULAR | ASP.NET CORE)

✉ lazicn378@gmail.com

📍 Pančevo, Serbia

☎ +381/65-368-3833

Profile

I'm a dedicated Full Stack Software Developer, specializing mostly in C#, ASP.NET Core, Javascript, Angular, SQL Databases, Microsoft Azure and I also write some PHP and Laravel code. Currently, I'm on final year on ICT College, Belgrade, Web Programming and Software Engineering department. For the past 4 years I'm actively learning programming, and I have 8 months of professional experience working on enterprise applications. I'm a hardworking person, and I love working in team since I have 4 years of working experience outside of programming. I have finished 4 months internship for specialization in ASP.NET Core Web API with Angular on the front.

I enjoy working collaboratively but can also run with projects independently.

I'm also experienced with software architectures, design patterns and Microsoft Azure Services.

One thing that I would highlight is that I've been freelancing in my local area for the past 6 months and had success with it.

Currently I'm actively reading software engineering books such as "Head first design patterns" and "Clean Code" so that I keep improving my knowledge in software engineering and development.

Employment History

Full-Stack Software Developer , Cycle d.o.o, Belgrade

September 2022 — Present

- Implemented and updated application modules under the direction of Senior Software Developers.
- Successfully finished tasks based on client requirements.
