Nenad Lazic

Junior Software developer (Angular | ASP.NET Core)

Pančevo, Serbia   lazicn378@gmail.com   +381/65-368-3833

Profile

I'm a dedicated Full Stack Software Developer, specializing mostly in C# .NET, ASP.NET Core, Javascript, Angular, SQL Databases, Microsoft Azure and I also write some PHP and Laravel code. Currently, I'm on final year on ICT College, Belgrade, Web Programming and Software Engineering department. For the past 4 years I'm actively learning programming, and I have 10 months of professional experience working on enterprise level applications. I'm a hardworking person, and I love working in team since I have 4 years of working experience outside of programming. I have finished 4 months internship for specialization in ASP.NET Core Web API with Angular on the frontend, SQL Server Database and Microsoft Azure Cloud.

I am a fast learner, a critical thinker, and a team player who is committed to delivering high-quality code that meets business objectives

I enjoy working collaboratively but can also run with projects independently.

I'm also experienced with software architectures, design patterns and Microsoft Azure Services.

One thing that I would highlight is that I've been freelancing in my local area for the past 10 months and had success with it.

I'm also actively reading software engineering books such as "Head first design patterns" and "Clean Code" so that i keep improving my knowledge in software engineering and development, and to improve the quality of the code I'm delivering.

Employment History

Sep 2022 — Present

Belgrade
